Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-34 and 62, drawn to a coating/developing system, classified in class 118, subclass 52.
- II. Claims 35-42 and 53-61, drawn to a reaction inhibiting/developing system, classified in class 156, subclass 345.1.
- III. Claims 43-52, drawn to a method, classified in class 438, subclass 758.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are deemed independent and distinct inventions as the invention of Group I is a coating/developing system while the invention of Group II is to a developing system including heating and cooling of a substrate in order to control a substrate reaction.

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used for a different process other than cooling, heating, and developing a substrate, the apparatus can be used for a different process such as maintaining a desired pressurized environment about the substrate so as to facilitate solvent evaporation of applied coating(s).

Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used for a different process other than cooling, heating, and developing a substrate for reaction inhibition, the apparatus as claimed can be used for a different process such measuring and testing wear resistance or durability of the coated product due to change in environmental conditions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Schlier on 10/20/04 to request an oral election to the above restriction requirement and a written restriction requirement was requested such that a telephonic election did not result.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1734

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Edwards whose telephone number is (571) 272-1227. The examiner can normally be reached on Monday-Friday.
